SITUATION SUMMARY

2017 Statewide Winter Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on Hwy 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.
- Pfeiffer Big Sur State Park reopened to the public on 07/01/17.
- Julia Pfeiffer Burns State Park, Andrew Molera State Park, and Highway 1 at Pfeiffer Canyon Bridge remain closed.
- Effective 07/01/17, there is a shuttle available until the Pfeiffer Canyon Bridge reopens.

Mud Creek Slide, State Route 1, Monterey County

The Mud Creek area on State Route 1 sustained a major slide on the evening of 05/20/17, when over a million tons of rock and dirt fell down the slope continuing down to the ocean floor 250 feet off the shoreline.

- Remains fully closed in both directions at Mud Creek due to continued slide activity. Delivery vehicles and local residents will need to use Nacimiento-Fergusson to exit south or to clear the access times at Paul's Slide. Local residents and delivery vehicles only; the only access to the public is accessing on Highway 1, using Nacimiento-Fergusson, will be to Gorda (PM 10) to the south, and to Limekiln State Park (PM 20.76) to the north.
- Estimated opening date is 06/01/18.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

***** Very hot this weekend interior valleys *****

***** Thunderstorms Eastern areas Late Sunday and in the North and East Monday *****

Strong high pressure over eastern NV will produce hot and dry conditions throughout the North Ops region today. Afternoon temperatures will be 8-12 degrees above normal with RH 8-18% inland from the immediate coast. The marine layer is now only about 1000 ft deep.

On Sunday a deepening offshore low pressure trough will move toward the coast and the high will weaken and move east. The resulting SE-S flow over western NV and CA will allow subtropical monsoon moisture to move northward. Isolated to scattered thunderstorms with limited rainfall are possible from the Cascade-Sierra crest east from about Lassen County south late Sunday. A few stray thunderstorms may develop farther north and west as well. Moisture will continue to increase on Monday, leading to scattered thunderstorms that produce a mixture of wet and dry strikes across our northern and eastern mountains from the afternoon into the overnight hours. Isolated thunderstorms are remotely possible Monday at lower elevations throughout the region as well. As the moisture increases over the area Monday night and Tuesday the storms will produce more rainfall, reducing the threat of dry strikes and new ignitions. Thunderstorms may become widespread in the north and east on Tuesday and early Wednesday, but with moderate to heavy rainfall. Strong gusty outflow winds are possible with any thunderstorm. Dry SW flow will return by late Wednesday and continue through the end of the week.

SOUTHERN CALIFORNIA

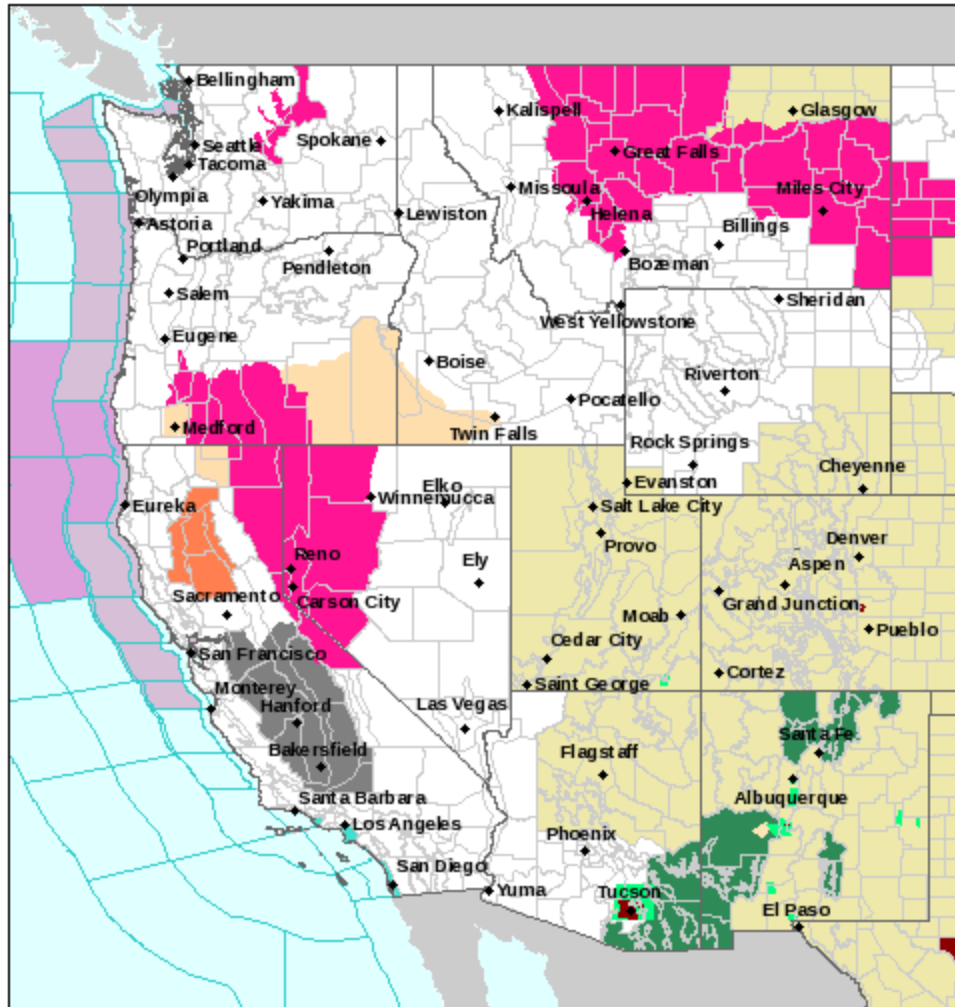

*****Warm and very dry today*****

Temperatures will be around 5 degrees above normal today as high pressure over the Great Basin strengthens. Maximum temperatures will be in the 80s to low 90s across the mountains and 90s to 102 in the valleys. Minimum humidity will remain mainly in the single digits and teens away from the coastal areas today. Temperatures will cool and humidity will increase Sunday through early next week as high pressure weakens and a weak area of low pressure spins off the California Coast. Southeast to south flow aloft will bring scattered showers and thunderstorms to the mountains and deserts Sunday afternoon through Tuesday afternoon. Some of the shower and thunderstorm activity may affect coastal and valley locations Sunday night through Monday night. High pressure over the Southwestern States will strengthen and build north bringing a warming and drying trend to the region Wednesday through the end of next week. Isolated afternoon showers and thunderstorms will be possible over the Sierra and over the mountains and deserts of Southern California east of I-15 Wednesday through the end of next week.

EMAC and Public Assistance - 2017 Winter Storms

- Cal OES Recovery Division identified the need for Public Assistance subject matter experts to assist with the aftermath of the 2017 Severe Winter Storms. Accordingly, Cal OES requested assistance from other states through the Emergency Management Assistance Compact (EMAC) - the Nation's mutual-aid system. New Jersey and Colorado provided personnel that arrived on Monday, 06/13/17. Both states along with other potential states will be providing support between now and the beginning of September at various Joint Field Offices throughout California. The goal is to assist those impacted counties in identifying disaster related damage and program eligibility.
